If You Have a Dog with a Nose... You Have a K9 Nose Work® Dog!

K9 Nose Work is the fun search and scenting activity that virtually all dogs and their people can enjoy. It starts with getting your dog excited about using his nose to seek out a favorite toy or treat reward hidden in one of several boxes. As your dog grows more confident with his nose, the game expands to entire rooms, exterior areas, and vehicles. Advanced K9 Nose Work focuses on increasing your dog's scent discrimination skills, adding special target odors to the search, and much more!

Every dog has the natural abilities to succeed and have fun with K9 Nose Work:

- Dogs with no prior training or dog sport experience find success early and often with K9 Nose Work as their first activity.
- Shy, fearful, or reactive dogs all love K9 Nose Work, because dogs are always crated and separated, and K9 Nose Work games are always played one dog at a time.
- High-energy dogs burn calories as they race around on the hunt. Aging or disabled dogs can flex their brain muscles as they puzzle out the search at their own pace.
